

## **Sigmatrics 2011 Student Travel Grants**

Sigmatrics 2011 offers travel grants to enable participation to the conference by students who would normally find it difficult to attend. This program has been made possible as a result of generous donations from Google, HP Labs, IBM Research, Intel, Microsoft, NetApp, and VMware.

Awarded students are highly encouraged to attend the tutorial program and the student activities. Students receiving a grant need to agree to serve as a session scribe (if required) during the conference.

### **Who should apply?**

Applications are accepted from graduate students (Ph.D. students preferred) at degree granting institutions throughout the world. Selection criteria will include evidence of a serious interest in measurement and modeling of computer systems and networks, as demonstrated by publications, coursework, project experience, and attendance to related conferences in the field. SIGMETRICS 2011 encourages travel grant applications from women and under-represented minorities.

### **How to apply**

To apply you should submit by e-mail a fully filled-out application form (see below) in ASCII, PS or PDF format (only) to:

Giuliano Casale (g.casale@imperial.ac.uk)

Application Deadline: April 30, 11:59 PM PST.

Notifications will be sent out via e-mail by May 9.

Applications will be reviewed by a Selection Committee :

Martin Arlitt Univ of Calgary/HP Labs, Canada/USA

Giuliano Casale Imperial College London, UK

Canturk Isci IBM Research, USA
